

NQM Draft Requirements List Questions and Answers

Question 62: Does the TMA have any expectations for the amount of time (i.e., full time or less) for the Medical Director or any other key staff?

Response 62: TMA does not have specific requirements related to the amount of time for the Medical Director and other key staff. Key personnel are those identified by the offeror as playing a critical role in the offeror's approach to achieving contract objectives. The qualifications and experience of key personnel will be assessed by the Government; it is up to the offeror to determine the appropriate amount of time an individual identified as "key" to the offeror's approach should spend involved with this effort.

Question 63: Regarding Section C.7.1.2 -- Of the types of providers listed in 32 CFR 199.6, which of these categories do not require physician referral?

Response 63: It is anticipated that when the RFP is released that the language will be revised to state that the NQMC shall have procedures in place to ensure the availability of non-physician reviewers of the provider types set forth in 32 CFR 199.6. The initial reference to physician referral will be deleted.
